

## Step-By-Step Guide for Replacing Hearing Aid Batteries

Hearing aids are crucial for many people to be able to live their lives with audio and without the aids they would be unable to hear anything at all. One crucial piece to a hearing aid is the batteries and replacing them is important but also intimidating. Below you will find a step-by-step guide for replacing hearing aid batteries.

**Step 1** The first thing you should do before replacing the batteries is to turn the aid off before removing it from your ear. This will help you to guarantee you actually turn it off which is crucial you do before replacing the batteries.

**Step 2** When you go to open the battery compartment it is crucial you gently and carefully open it. The hearing aid is comprised of several small pieces and if you are not careful when opening up the compartment you run a risk of damaging pieces of the aid which would be a terrible thing.

**Step 3** Once the compartment is open you need to remove the battery. Typically a fingernail will be enough to remove the battery. Once you have removed the battery you can simply throw it away as the batteries for hearing aids are made out of zinc air and are safe to dispose of in the garbage.

**Step 4** You now need to get the new battery. When you remove it from its package you need to be extremely careful as these batteries are small and can be easily lost. It is recommended that you remove it from its package over a table so if you drop it you can easily find it.

**Step 5** When you go to insert the battery into its compartment you need to hold the tab that is on the battery. The purpose of this tab is to make it easy to insert the battery and also to activate the battery. Once the battery is in its compartment you can peel off the tab.

**Step 6** Finally close the door to the battery compartment. Once you have successfully inserted the new battery turn the hearing aid on to ensure that everything sounds correct and that you have properly inserted the battery. If everything sounds good, you are done!

Changing the battery on your hearing aid is crucial but also intimidating. Follow this step-by-step guide to replacing hearing aid batteries and you will be able to properly and effectively replace the batteries in your hearing aid.
